

DRC800

Universal Remote Control

The Motorola DRC800 is a full-featured, universal remote control designed for the Motorola DCT family of interactive digital set-tops. Able to control up to four consumer electronic devices, the DRC800 supports advanced features such as Digital Video Recording (DVR), High Definition (HD), and Picture-in-Picture (PiP). Various commercially deployed Electronic Program Guides (EPG) are supported as well as popular features like on-screen menus, favorite channels, last channel recall, program information, help, and time-controlled programming. A newly expanded code library provides control of even more peripheral components including most TVs, VCRs, DVD/CD players, Personal Video Recorders (PVRs), audio receivers, amplifiers, audio tuners, home theaters, TV/DVD combos, and TV/VCR combos.

In addition to optimized control over current Motorola digital set-tops, the DRC800 is backward compatible with earlier digital and advanced analog Motorola set-tops.

Featuring a sleek and compact design, the DRC800 universal remote control supports advanced features including DVR, HD, and PiP.

HIGHLIGHTS INCLUDE:

- New sleek, compact design adds buttons for DVR functionality, including REPLAY, LIST, and LIVE TV as well as PiP support
- Supports multiple Electronic Program Guides (EPGs)
- Direct access to Video on Demand (VOD) and Pay-Per-View (PPV)
- Includes an ASPECT button for support of High Definition television
- Includes three reserve keys (A, B, and C) for MSO customization

- Step and Set feature allows consumers to set up electronic devices without a 4-digit code. The DRC800 scans until it finds the appropriate code. This feature is very useful for consumers that lose their user guide and can decrease customer calls to the operator.
- Mode Light allows the consumer to know which device they are using when pressing a button.
- Volume Lock allows the consumer to lock the volume to a specific device (TV, audio component or set-top box). Great feature for home theaters.
- Memory Retention ensures that codes are held in memory while changing batteries.
- Blink Out feature allows customers to identify the code of a specific device that is programmed into the DRC800. Helpful in conjunction with Step and Set feature.
- LAST button returns user to the last channel they were watching easily and conveniently and acts as a navigational aid in EPG applications.
- FAV button allows users to quickly surf from favorite channel to favorite channel once their favorite channel list has been programmed through the EPG.
- HELP button allows users to learn about a specific feature on their own, potentially reducing the number of customer calls to the operator.
- INFO button provides information about the currently selected program - either live or through the EPG.
- Includes an easy-to-follow User Guide and two AA heavy duty batteries.
- Features a one-year limited warranty.

Specifications are subject to change without notice.
