CONTENTS

GETTING STARTED

Welcome to the new SecureSmart Application! With this application, you will be able to gain total control over your home by having access to your security system, lights, locks, thermostats, cameras, and garage doors.

DOWNLOAD THE SECURESMART APP

The free Android SecureSmart app by ipDatatel, LLC is downloadable from the Play Store for Android devices.

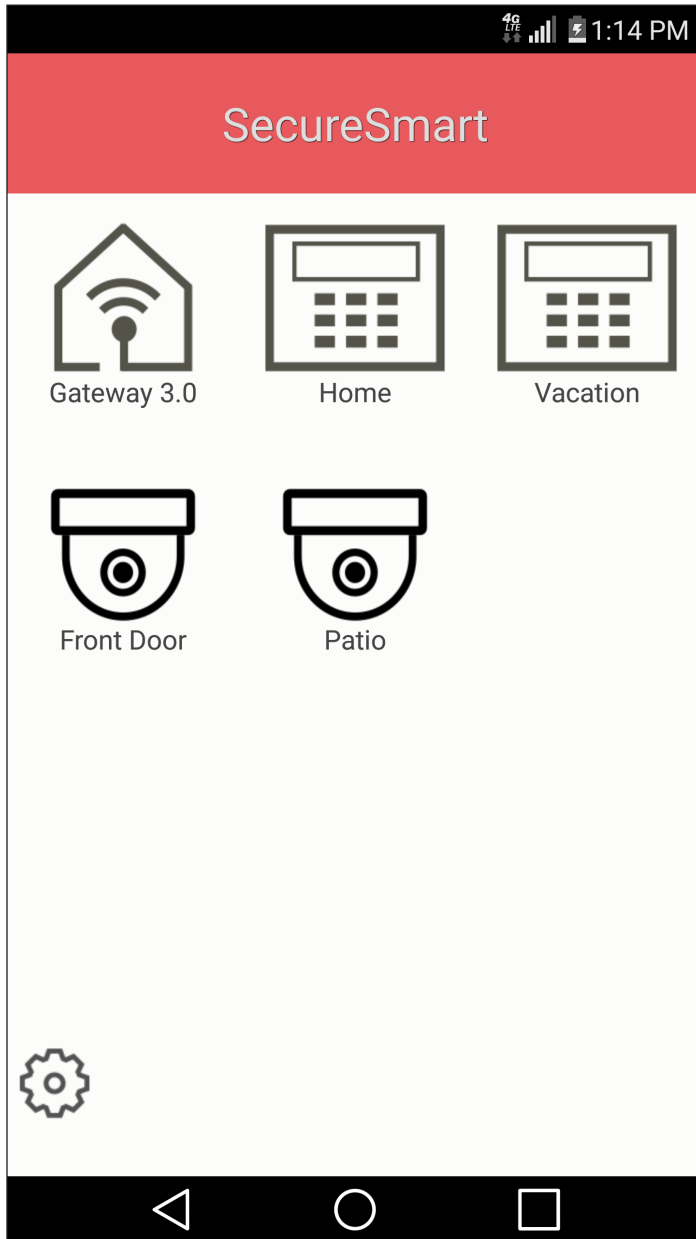

LOGIN

Your alarm dealer should have created a username and password for you to log into the application. If not, please contact your alarm dealer for this information. Once installed, enter in your **Username** and **Password**.

Every time the application is launched, it will check to see if any changes have been made to your account.

Check the 'Sounds' box to hear audible tones when pressing keypad buttons.

MAIN SCREEN

The Dashboard is where you can easily access all of your devices attached to your account. It may take a few moments to poll all Z-Wave & Security devices to get the proper status.

CONTROLS

Selecting any category will display all connected and available devices.

Security System
Displays keypad for arming and disarming system.

Home Automation
Displays icons for all connected devices (requires ipDatatel Gateway 3.0 device sold separately).

Cameras
View live video for connected video cameras.
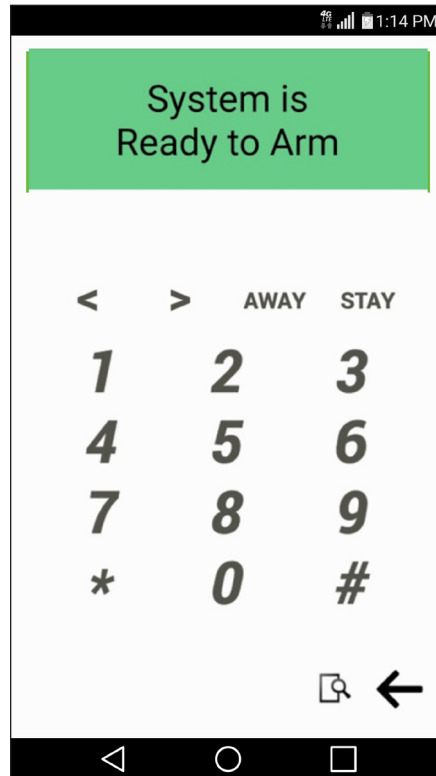

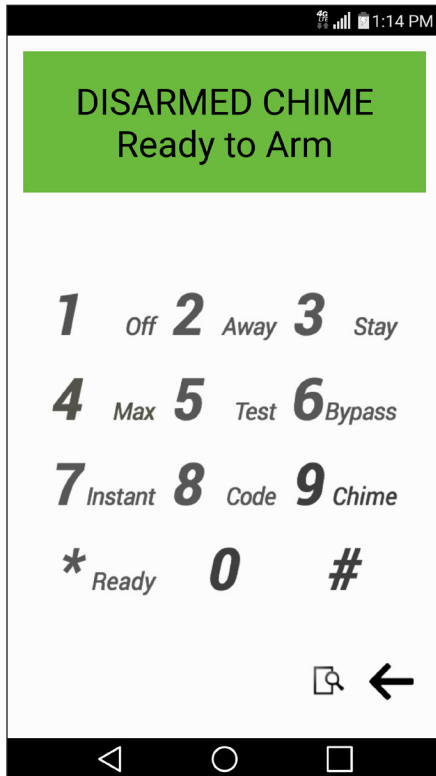

SETTINGS

Account Info
Enter username, password, and change Sound settings.

SECURITY SYSTEM

SECURITY SYSTEM KEYPAD

This is where you will be able to access your security system and use the Virtual Keypad as if you were standing in front of the keypad in your home. Simply enter your security code to arm or disarm your system.

Your keypad will look like one of these three main supported panels for GE, DSC, or Honeywell.

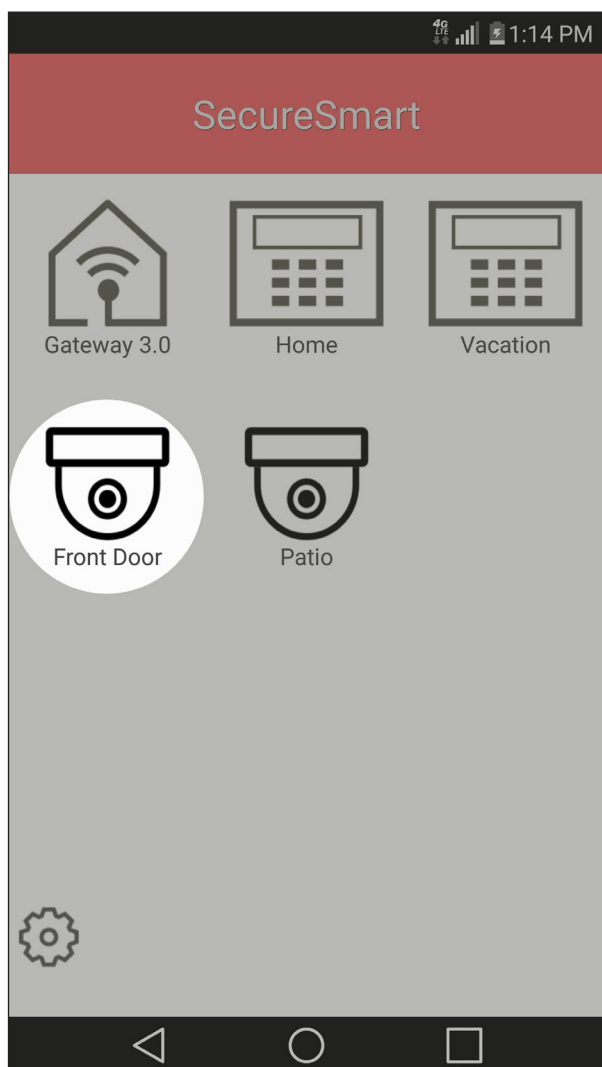

VIEWING SECURITY EVENTS

To view events, you can access the event log by pressing (⌕) to see past signals transmitted from your security system.

VIDEO CAMERAS

VIEWING LIVE VIDEO

You can view live video from IP cameras by selecting your camera from the main screen.
HOME AUTOMATION

The security system is just the start of what SecureSmart has to offer. You can also control your Z-Wave products and cameras (locks, garage doors, lights, thermostats and cameras) all from the same application.

GATEWAY 3.0

To control your connected devices, select the Gateway icon from the main screen.

CONTROLS

Selecting any category will display all connected and available devices.

Lights
View status and turn on and off all connected lights.

Locks
View status and remotely lock and unlock all connected locks.

Thermostats
View and control temperature, and switch between heating and cooling.
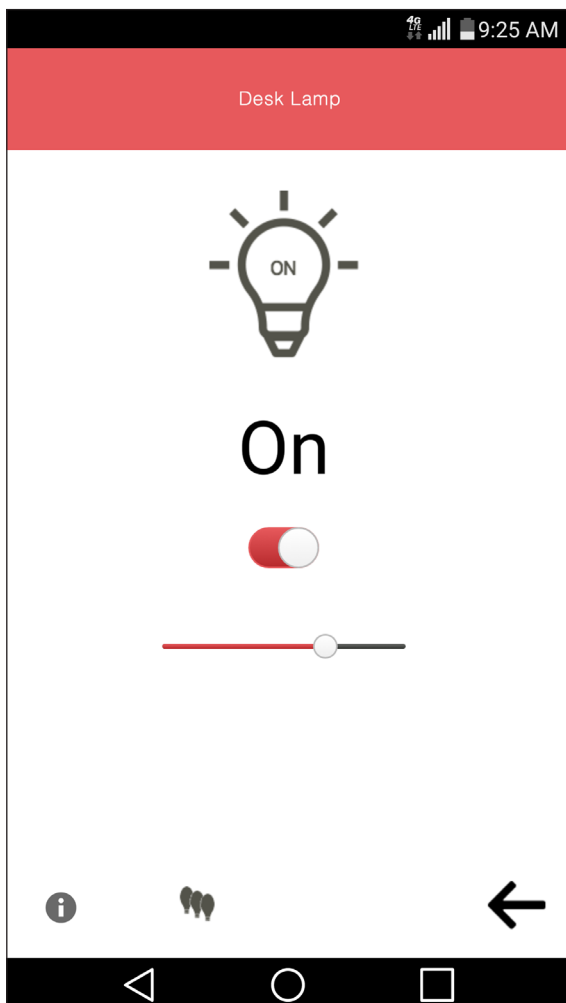

Garage Doors
View if door is open or closed and remotely open and close garage door.

ALL ON/OFF SWITCH FOR LIGHTS

To turn all of your lights on or off at the same time touch the icons (All ON   ) / (All OFF   )

DOOR LOCKS

This is where you will be able to access your door locks. You can check their status and toggle them to be locked or unlocked by using the switch or tapping the icon.
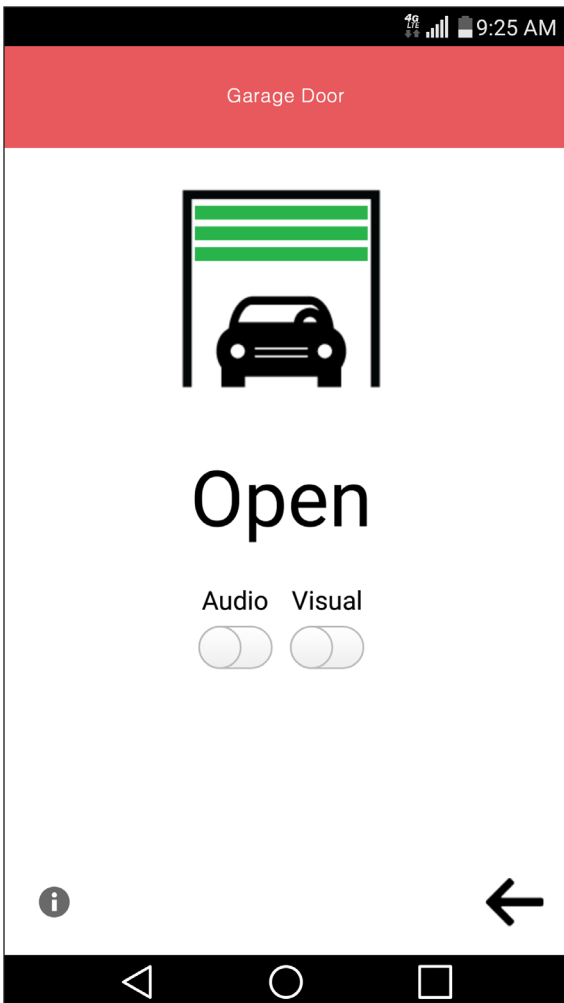

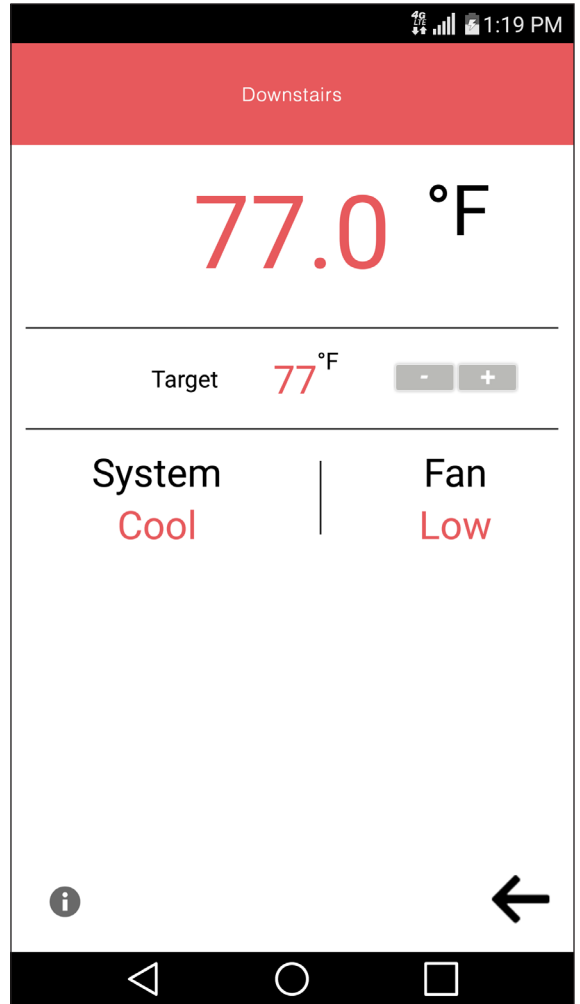

LIGHTS & SWITCHES

This is where you will be able to access any light bulbs or switches. You can turn them on or off by toggling the switch or tapping the icon. Or, you can dim the light using the slider.

THERMOSTATS

This is where you will be able to access the thermostats you have connected to your gateway. You will be able to adjust the temperature, turn the fan on or off, and control whether it is heating or cooling.

GARAGE DOORS

This is where you will be able to control your garage door. You will be able to see its status as well as open and close the garage door. This feature only works with supported Z-Wave garage door accessories.
